Presentation

>>>> PNEUMATIC FOOT CONTROL

61898

Foot control for the
opening of the door.

Air pressure control
element generating a
signal to open the door.

>>>> RADIO REMOTE CONTROL*

Individual transmitter for
opening one or more doors.

Mains-powered receiver,
operating with a battery
powered transmitter
commands the opening
control.

Compact model
61496

Industrial model
61494

* Compact model not compatible with
our Autokit 80.

>>>> CONTACTLESS SWITCH

Movement detector without contact.

IP65 waterproof version.

61892-21

61896-21

A hand movement in
front of the detector
activates the door
opening.

>>>> OPENING SENSOR

Door opening detector for pedestrians.

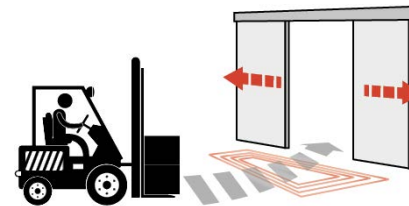

Based on
microwave
technology,
it detects
movements
of a minimal speed of 5cm/sec. within defined area, thus
activating the door opening.

58509

>>>> MAGNETIC LOOP

Vehicle detector
controlling the
automatic opening of
the door.

58657 - 65273

Loop implanted within the ground allowing the magnetic
detection of vehicle to control the door opening.
